REASONS		**Slide Number**	3	**Last Revised By**	SANTNER
Slide Mockup/ Layout					
Narration/ Voice-Over	Select the items below that are common reasons why application security is not implemented.				
On-Screen Text	**[OST1]** Select the items below that are common reasons why application security is not implemented.				
Graphics/ Animation	Drag and drop interface of the numbered buttons to the grey placeholders. All answers are valid, so a validation of "Correct - ALL of these reasons why application security is not implemented" appears when all 4 are selected. Padlock LOCKS when all 4 are selected.				
Additional Notes					

Course Title	102 - CHALLENGES IN APPLICATION SECURITY			**Last Revised Date**	12/5/2022
COST		**Slide Number**	4	**Last Revised By**	SANTNER
Slide Mockup/ Layout					
Narration/ Voice-Over	Select the solution that best supports cost management for Application Security.				

On-Screen Text	**[OST1]** Select the solution that best supports cost management for Application Security.
Graphics/ Animation	Drag and drop interface of the numbered buttons to a single grey placeholder. On-demand Managed outsourced services partner is the correct answer, so a validation of "Correct - Managed Services would likely be the most cost-effective solution" appears when it is selected.
Additional Notes	Supportive text follows: "Annual contracts are costly, often spanning times when IT services are not needed. Additionally, a full-time employee for application security requires a myriad of skills, including deep knowledge of multiple domains, expertise in areas ranging from malware to threat mitigation, cryptography, forensics, advanced analytics, network virtualization, cloud security, and mobile security, as well as industry-specific knowledge." "Managed services, therefore, is the best solution, minimizing service expenditures to only when needed, can work on multiple projects at the same time, do not require paid benefits,

Course Title	102 - CHALLENGES IN APPLICATION SECURITY			**Last Revised Date**	12/5/2022
LEGACY AND THIRD-PARTY APPS		**Slide Number**	5	**Last Revised By**	SANTNER
Slide Mockup/ Layout					
Narration/ Voice-Over	"Select two causes of legacy and third party apps becoming application security threats."				
On-Screen Text	**[OST1]** "Select two causes of legacy and third party apps becoming application security threats."				
Graphics/ Animation	Drag and drop interface of the numbered buttons to two grey placeholders. 1 and 3 are correct, so a validation of "Correct - legacy and third party apps are likely verified just as thoroughly" appears when it is selected. "Incorrect" - legacy and third party apps are likely verified just as thoroughly" appears on screen if #2 is selected.				
Additional Notes					

Course Title	102 - CHALLENGES IN APPLICATION SECURITY			**Last Revised Date**	12/5/2022
ELASTIC CAPACITY		**Slide Number**	6	**Last Revised By**	SANTNER
Slide Mockup/ Layout					
Narration/ Voice-Over	Select two causes of "lumpy demand" in an organization's testing process.				
On-Screen Text	**[OST1]** Select two causes of "lumpy demand" in an organization's testing process.				
Graphics/ Animation	Drag and drop interface of the numbered buttons to two grey placeholders. 2 and 3 are correct, so a validation of "Correct - fixed release/consistent demand schedules are the antithesis of lumpy demand" appears when it is selected. "Incorrect - fixed release/ consistent demand schedules are the antithesis of lumpy demand" appears on screen if #1 is selected.
